Focus on Performance Tables

Meeting Date: **April 2017**

This report presents a balance scorecard of key indicators used by NHS England to assure itself on CCG delivery.

In addition to this report, the Operational Executive will be monitoring a full set of metrics across the various NHS related Outcome Frameworks.

Any issues of concern will be escalated to the governing body.

Key Performance Issues - Narrative Section

Key Performance Issues

Background

Key performance issues have been identified for escalation to the Governing Body within the narrative below. To support the Governing Body in understanding the current performance position, additional narrative and graphical representation has been included within the later section of the performance report.

1) A&E

The novation of the Care UK contract to TRFT is now complete and both A&E and Walk In Centre Activity is included in the national reporting for Rotherham in line with other Health Economies. Governing Body members should note that the position for the combined A&E and WIC activity was 85.1% in February and 90.3% in March (as at 20th Mar). The Rotherham position for A&E has significantly improved from the third week in February and continued throughout March, GP streaming has been implemented within the department, which has had an impact. The CCG continue to work closely with partners through the A&E delivery board to realise improvement. (Local comparison to other Trust's in South Yorkshire can be found in the A&E focus on section).

The TRFT A&E position (Type 1) for March based on data to the 20th of March was 84.1%. The position year to date is 86.5%, excluding November. The national position for England for January 17 was 85.1% with the North of England position at 85.0%. January published performance for local providers was as follows:

Sheffield Children's NHS Foundation Trust – 98.3% / YTD – 97.3%

Sheffield Teaching NHS Foundation Trust – 83.8% / YTD – 87.3%

Barnsley Hospital NHS Foundation Trust – 87.1% / YTD – 91.7%

Doncaster and Bassetlaw Hospitals NHS Foundation Trust – 85.1% / YTD – 91.5%

2) YAS

YAS are currently participating in an NHS England-led Ambulance Response Programme (ARP), which went live from the 21st April 2016. The pilot ran for 3 months initially and has subsequently been extended. This programme resulted in a change to call category classifications, which has been monitored on this report. These classifications have subsequently been revisited by the programme and further changes implemented during October. The only standard currently available to assess performance is 75% of category 1 calls under 8 minutes. In the fourth full month of monitoring this (February), YAS achieved 53.8% against the 75% standard.

The 15 minute turnaround performance at RFT is 67.10% on handovers on target in February (average handover time as 17:06 mins). Handovers at the Northern General Hospital have improved from 46.20% in January to 48.20% in February.

3) Improving Access to Psychological Therapies (IAPT) - 6 and 18 week waiting time

The national target for patients accessing IAPT services is 75% within 6 weeks and 95% within 18 weeks. The 6 week wait position for Rotherham CCG as at w/c 20th March 17 was 66.9%. This is below the standard of 75%. February indicative performance was also 66.9%. The IAPT position therefore remains challenged.

The 18 week wait position for the service w/c 20th March 17 was 97.9%. Performance is consistently meeting the 95% standard for 18 weeks.

The IAPT service has engaged with an Intensive Support Team visit. Actions are being undertaken following this visit. The key initial action was to move to a self-referral model as per national best practice which commenced in January. Workforce training and vacancies have impacted on the ability to deliver the target, however assurance has been provided from RDASH that vacancies are now filled.

4) Cancer

In January the 62 day GP referral to treatment target did not meet the national standard of 85%, with performance at 79.2%. This is the sixth consecutive month that the standard has not been met at a CCG level. Breaches of the standard were due to a number of reasons but most related to pathway delays or complexities. 5 of the 10 breaches related to pathways split between Rotherham Foundation Trust and Sheffield Teaching Foundation Trust.

In January all other cancer standards were met.

5) Referral to Treatment

RTT Incomplete Pathways continue to meet the 92% national standard in February with performance at 94.5%. Further details of specialty level performance can be found in the "focus on" section of the report. The CCG continues to see strong Referral to Treatment performance in most specialties.

6) Referral to Treatment - 52 week waits

In February there was one 52 week waiter. This occurred at Doncaster and Bassetlaw Foundation Trust. This occurred due to a recording error when the patient was referred to Sheffield Teaching Foundation Trust for further investigations. The patient was inaccurately recorded as having their 18 week clock stopped. The pathway was subsequently added back to the waiting list and revalidated and the patient has been seen. Please note this is not detailed in the quality report as the data has only become available after the completion of that report.

7) Eliminating Mixed Sex Accommodation Breaches (EMSA)

In February, there were no EMSA breaches.

8) Diagnostic Waiting Times

The February position for the CCG has seen considerable improvement with performance of 0.3% against the target of 1%.

10 breaches occurred during February. There was 1 at TRFT (Respiratory Physiology – Sleep Studies), 6 at Rotherham Community Health Centre (1 Non-obstetric Ultrasound, 4 DEXA Scan, 1 Cardiology - echocardiography), 1 at Doncaster & Bassetlaw (Gastroscopy) and 2 at Leeds Teaching Hospital (2 Magnetic Resonance Imaging).

9) Incidence of C.Difficile

YTD performance for the CCG overall as at February was 53 cases against a plan of 59. The yearend target is 63 cases. The 2 cases in February both occurred at Rotherham Foundation Trust.

RFT 2016-17 YTD performance is 18 cases against their annual target of 26.

NHS Constitution and Pledges

Referral to Treatment	Dec-16	Jan-17	Feb-17	Target	QP
% Patients on incomplete non-emergency pathways waiting no more than 18 weeks (Commissioner)	94.5%	94.0%	94.5%	92.0%	Y

			Reporting Frequency	Latest available data	Latest Period Performance	Target
Better Health	01. Smoking	Maternal smoking at delivery	Quarterly	Q3 2016/17	19.9%	
	02. Child obesity	Year 6: Prevalence of overweight (including obese) - Children aged 10-11 classified as overweight or obese	Annual	2015/16	35.8%	
	03. Diabetes	Diabetes patients that have achieved all the NICE recommended treatment targets. Three (HbA1c, cholesterol and blood pressure) for adults and one (HbA1c) for children	Annual	2015/16	37.9%	
		People with diabetes diagnosed less than a year who attend a structured education course	Annual	2015/16	6.2%	
	04. Falls	Injuries due to falls in people aged 65 and over (Actual - true figure is based on standardised measure that is currently not available)	Annual	2015/16	11392	
	05. Personalisation and choice	● % GP Referrals to First OP Appointments Booked Using Choose and Book	Monthly	Dec-16	69.7%	80.00%
		A greater proportion of people aged 18 and over suffering from a long-term condition feeling supported to manage their condition (GP Survey)	2nd half of each year	July 2015 - March 2016	66.2%	
		Percentage of deaths which take place in hospital	Annual	2015/16 Q3 - 2016/17 Q2	46.1%	
06. Health inequalities	Personal Health Budget	Quarterly	Q2 16/17	35.0		
	Inequality in unplanned hospitalisation for chronic ambulatory care sensitive conditions	Quarterly	Q4 15/16	1157.66		
07. Anti-microbial resistance	Inequality in emergency admissions for urgent care sensitive conditions	Quarterly	Q4 15/16	2391.91		
	● Anti-microbial resistance: appropriate prescribing of antibiotics in primary care	Monthly	Dec-16	1.228	1.161	
08. Carers	● Anti-microbial resistance: Appropriate prescribing of broad spectrum antibiotics in primary care	Monthly	Dec-16	7.20	11.30	
	Health related Quality of Life for Carers (GP Survey)	Annual	2015/16	0.77		

Improvement and Assessment Framework

		Reporting Frequency	Latest available data	Latest Period Performance	Target	
Better Care	01. Care ratings	Use of High Quality Providers-Hospitals	Quarterly	Q3 2016/17	52	
		Use of High Quality Providers-Primary Medical Services	Not currently in publication. First publish date in late 2016/17. Frequency to be confirmed.			
		Use of High Quality Providers- Adult Social Care				
	02. Cancer	● Percentage of patients receiving first definitive treatment for cancer within two months (62 days) of an urgent GP referral for suspected cancer.	Monthly	Jan-17	79.2%	85.0%
		● Cancer patient experience (National Cancer Patient Experience Survey)(1)	Annual	2015	8.7	8.7
		● One year survival from all cancers	Annual	2014	68.4%	
		● Cancers diagnosed at early stage	Annual	2014	36.5%	60.0%
	03. Mental health	● % of people who are moving to recovery	Monthly	Dec-16	47.5%	50.0%
		● People with first episode of psychosis starting treatment with a NICE recommended package of care treated within 2 weeks of referral	Monthly	Jan-17	100.0%	50.0%
		Children and young peoples mental health services transformation	Quarterly	Q2 2016/17	70.00%	
		Crisis care and liaison mental health service transformation	Quarterly	2016-17 Q3	30.0%	
Out of area placements for acute mental health inpatient care - transformation		Quarterly	2016-17 Q3	100.0%		
04. Learning disability	Reliance on specialist inpatient care for people with a learning disability and/or autism	Quarterly	Q2 2016/17	80		
	Proportion (%) of eligible adults with a learning disability having a GP health check	Annual	2015/16	73.6%		
05. Maternity	Choices in maternity services	Annual	2015	6.17		
	Neonatal mortality and stillbirths (Rate per 1,000)	Annual	2014	9		
	Women's experience of maternity services (National Maternity Services Survey)	Annual	2015	7.87		
06. Dementia	Dementia care planning and post-diagnostic support	Annual	2015/16	77.2%		
	● Estimated diagnosis rate for people with dementia.	Monthly	Feb-17	74.80%	71.5%	
07. Urgent and emergency care	● Ambulance waits (Category 1 Under 8 Minutes)	Monthly	Feb-17	53.8%	75.0%	
	● % of patients admitted, transferred or discharged from A&E within 4 hours (TRFT)	Monthly	Mar-17	84.1%	95.0%	
	● Delayed transfers of care from hospital per 100,000 population (average per month)	Monthly	Jan-17	285.72	225.8 (2)	
	Emergency admissions for urgent care sensitive conditions	Quarterly	Q4 2015/16	2484		
	population use of hospital beds following emergency admission	Quarterly	Q1 2016/17	1.07		
	Achievement of milestones in the delivery of an integrated urgent care service	Monthly	Aug-16	2		
08. Primary medical care	Primary Care Access	Intended first publication Late 2016/17				
	● Patient experience of Primary Care - GP services	Bi-annual	Jul-Sep 15 to Jan-Mar 16	84.8%	74.6%	
	Primary care workforce (FTE per 1,000 patients)	Monthly	Nov-16	91		
	● Unplanned hospitalisation for chronic ambulatory care sensitive (ACS) conditions (rate per 100,000)	Annual	2015/16	997	1074	
09. Elective access	● Patients waiting 18 weeks or less from referral to hospital treatment	Monthly	Feb-17	94.5%	92%	
10. 7 Day services	Achievement of clinical standards in the delivery of 7 day services	Intended first publication September 2016				
11. NHS continuing healthcare	People eligible for standard NHS continuing healthcare (Rate per 50,000 population)	Quarterly	2016/17 Q2	52.89		

(1) The Cancer Patient Experience target is the National Average for 2015, so Rotherham's performance is being measured against the national average

(2) The delayed transfer of care target is the target for the month.

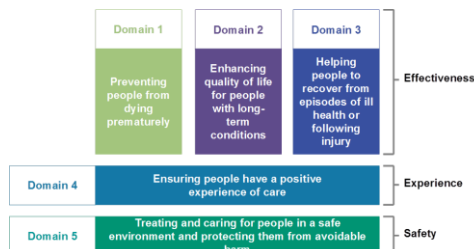

Improvement and Assessment Framework

			Latest available data	Target
Sustainability	01. Financial sustainability	Financial plan	●	Green
		In year financial performance	Not currently in publication	
	02. Allocative efficiency	Outcomes in areas with identified scope for improvement	Not currently in publication	
		Expenditure in areas with identified scope for improvement	Not currently in publication	
	03. New models of care	Adoption of new models of care	Not currently in publication	
04. Paper free at the point of care	Local digital roadmap in place	In Place		
	Digital interactions between primary and secondary care	48.50%		
05. Estates strategy	Local Strategic Estates Plan (SEP) in Place	In Place

Supporting Narrative

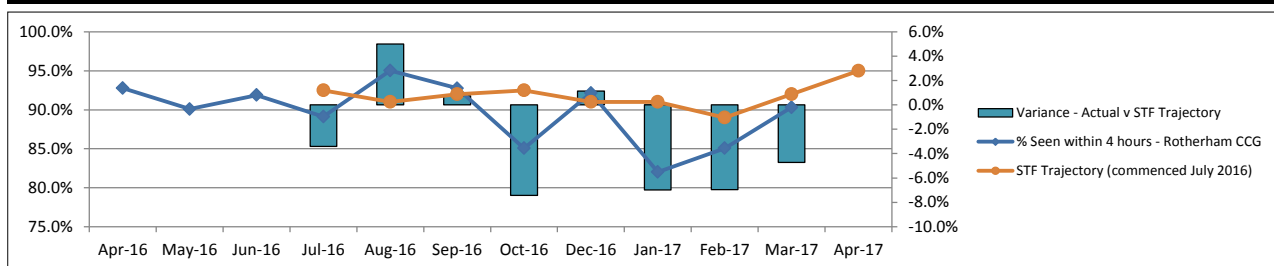

Rotherham CCG data is used to monitor for the Quality Premium and is now published via NHS England on a monthly basis; however it runs 1 month in arrears.

To monitor A&E in a timely manner it has been agreed to use RFT's daily data as a proxy for the CCG measure. The RFT A&E position (Type 1) March to date was 84.1%. Performance during this period last year (March 2015) was 88.6%.

November has been excluded from the table due to the issues with reporting previously noted in the main narrative section.

Focus on - STF Trajectory

	Apr-16	May-16	Jun-16	Jul-16	Aug-16	Sep-16	Oct-16	Dec-16	Jan-17	Feb-17	Mar-17	Apr-17

Total cancer patients waiting to be seen within 62 days of referral from GP		32	50	51	63	65	47	53	71	55	64	58	48

Supporting Narrative

In January the 62 day GP referral to treatment target did not meet the national standard of 85%, with performance at 79.2%. This is the sixth consecutive month that the standard has not been met at a CCG level.

TRFT saw a drop in performance from December, 84.9% to January 81.7%, which is under the national standard.

National performance in January was 79.5%

There were 10 breaches in January for RCCG patients:

FIRST SEEN	FIRST TREATMENT	REASON
Rotherham FT	Sheffield Teaching FT	IPT late in pathway (RFR day 51) Then outpatient capacity inadequate (RHQ)
Sheffield Teaching FT	Sheffield Teaching FT	Patient choice
Rotherham FT	Rotherham FT	Inefficient pathway
Rotherham FT	Sheffield Teaching FT	IPT late in pathway (RFR day 39). Then complex diagnostic pathway
Rotherham FT	Sheffield Teaching FT	Need for repeat biopsy resulted in IPT late in pathway (RFR day 45)
Rotherham FT	RFR	Inefficient pathway + patient choice (patient thinking time)
Rotherham FT	Rotherham FT	Need for repeat colonoscopy + delay to MDT discussion
Rotherham FT	Sheffield Teaching FT	pat dna'd clinic appt booked 16/12; re-arranged 2nd appt
Rotherham FT	Rotherham FT	Inefficient pathway
Rotherham FT	Sheffield Teaching FT	IPT after breach date (RFR day 84)
