NHS Rotherham Clinical Commissioning Group

Primary care sub-group – 2 October 2017

Primary care committee – 11 October 2017

General Practice Forward View (GPFV) Programme

Lead Executive:	Chris Edwards
Lead Officer:	Jacqui Tuffnell
Lead GP:	Dr Avanthi Gunasekera

Purpose:

The purpose of this paper is to update the committee on progress in relation to implementing Rotherham's response to the GPFV.

Background:

The GPFV was published in April 2016 and Rotherham chose to incorporate the requirements into its interim strategy for general practice and developed a comprehensive document ' Rotherham's response to the GPFV'.

This is a quarterly update of progress in relation to delivering the requirements detailed within the document.

Analysis of key issues and of risks

Workforce – difficulties with practices continuing to recruit to the traditional model and not bringing in new workforce roles in time to meet the increasing gap in GP and nursing workforce

At scale working – Federation development has been slower and actions are being taken to mitigate

Access – inability to include DES extended access hours had led to a requirement to create a local enhanced service increasing cost overall

Financial Implications:

These are incorporated into the individual projects

Human Resource Implications:

This is having significant workforce implications on the primary care team. Support had been identified from the NHS England transformation team however this has now been withdrawn as the team are concentrating on ACS delivery.

Procurement:

N/A

Recommendations:

To note the progress of implementing the Rotherham response to the GPFV
