## Choosing the right care, first time

**A guide to help you choose the care you need in Rotherham.**

Getting the right care, first time ensures you receive the best possible treatment, leaving health services free for those who need them most.

**Please keep this leaflet in a safe, handy place so you can refer to it when needed.**

Health services are very busy at the moment. Help us to help those most in need. Follow these steps for the right treatment, first time.

## Self care

You can treat most common ailments and illnesses at home by keeping a well-stocked medicine cabinet. This should include:

- Pain relief e.g. paracetamol or ibuprofen.
- Children's paracetamol oral suspension and ibuprofen syrups.
- Mild laxatives to relieve constipation.
- Cold relief products.
- Rehydration mixtures to use if feeling dehydrated after a bout of sickness or diarrhoea.
- Indigestion remedy.
- A range of bandages, plasters, non-absorbent cotton wool, elastic bandages and dressings for minor cuts, sprains and bruises.

Many medicines are low cost and can be bought over the counter from pharmacies and also some other retailers.

## Pharmacy +

We all know pharmacies dispense medicines. But they do a lot more than that!

Many pharmacies are open until late and on weekends and bank holidays. You don't need an appointment, and can just pop in and get expert medical help from a qualified professional.

Most pharmacies now have a private consultation area where you can discuss your issues and concerns without being overheard.

Pharmacies can help with a range of common conditions and minor injuries. The pharmacist will be able to assess your needs, give you advice, suggest medicines to buy if appropriate and refer you to another service if necessary.

## Children

All children get colds. This is a normal part of growing up and no medicines can prevent them. The best way to look after your child is to make sure they have plenty to drink and, if they have a temperature, some paracetamol will help. Doctors don't recommend cough medicines and antibiotics won't help a cold.

## NHS 111

NHS 111 offers confidential health advice and information by telephone 24 hrs a day.

Ring 111 if you are ill and have questions about your health and where to get treatment.

Advisors are able to arrange out-of-hours appointments with a GP, for urgent access, when your practice is closed.

## GP services

Make an appointment with your local GP if you have an illness or injury that will not go away.

Saturday and Sunday appointments are available at hubs across Rotherham aimed at people who struggle to get an appointment during the working week. Ask about these appointments at your GP practice's reception.
